Foreword by IPNA’s President

IPNA presidency is a fascinating challenge, with both global and individual missions. From September 2013, we have tried to help children with renal disease and pediatric nephrology practice all over the world.

Here are some examples of major actions due to outstanding committee chairs/members:

- Complete revision of the Constitution in order to fit the current changes of the world
- Increased membership by 20-25% due to joint membership with regional societies
- Website revisited; IPNA on social media
- Educational actions in ‘priority regions’: French-speaking Africa and new sites in Asia
- Juniors actions: Juniors network, participation at the council, Master Junior Classes
- Increased number of teaching courses and fellowships
- Sister centre program
- IPNA World Kidney Day
- Creation of a world IPNA registry
- Initiation of IPNA guidelines process

Professor Pierre Cochat, from Hôpital Mère Enfant, Lyon, France, is the current IPNA President since 2013. He will step down during the next IPNA Congress to be held in Venice, Italy, in 2019.
About IPNA

Comprised of over 1600 pediatric nephrologists representing 103 nations around the world, IPNA works to disseminate knowledge about kidney disease in children in the areas where care is needed most.

IPNA’s mission is to promote the optimal care of children with kidney disease worldwide by advocacy and education.

Currently, IPNA accomplishes these goals through numerous initiatives and programmes among others Fellowships, Teaching Courses and Junior Classes.

GREAT CARE FOR LITTLE KIDNEYS. EVERYWHERE.
